

Export & import CMS Pages  
& Static Blocks via CSV Files

## **CMS - Pages & Static Block Import/Export**

Using this extension you can export and import bulk CMS Pages & Static Blocks from one server to another via CSV Files.

## **FEATURES:**

- 1) Import/Export CMS pages and static blocks
- 2) You can choose the import behaviour in import section (Either Append or Replace)

## **Extension Usage**

1. You can find the options in Magento admin under **CMS → Pages/Static Blocks**

Export and Import buttons are there. You can run the export to get a CSV of CMS Pages/Blocks already in your site and then you can upload this file in the upload section and it will import it back in.

2. Note the following fields in the CSV

In Static Block

- 1) **Title**
- 2) **Identifier** -Block Identifier
- 3) **Content**
- 4) **Is\_Active** – Block Status (Enabled(1)/Disabled(0))
- 5) **Stores** - These are the store Ids
- 6) **Date\_Created**
- 7) **Last\_Updated**

First 5 fields are mandatory.

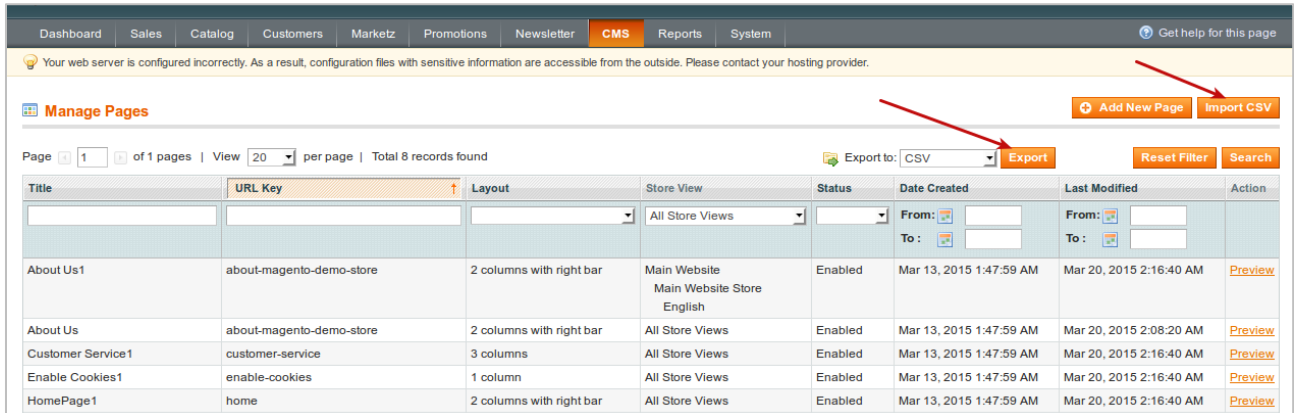

In CMS Pages

- 1) **Title**
- 2) **Identifier** – URL key of the page (Unique field)
- 3) **Content** - actual cms page content
- 4) **Is\_Active** – Block Status (Enabled(1)/Disabled(0))
- 5) **Stores** - These are the store Ids
- 6) **Root\_Template**- type of layout can be one\_column /two\_columns etc
- 7) **content\_heading** - cms page content heading
- 8) **Meta\_Keywords** - cms page meta keywords
- 9) **Meta\_Description** - cms page meta description
- 10) **custom\_root\_template** -type of layout can be one\_column /two\_columns etc

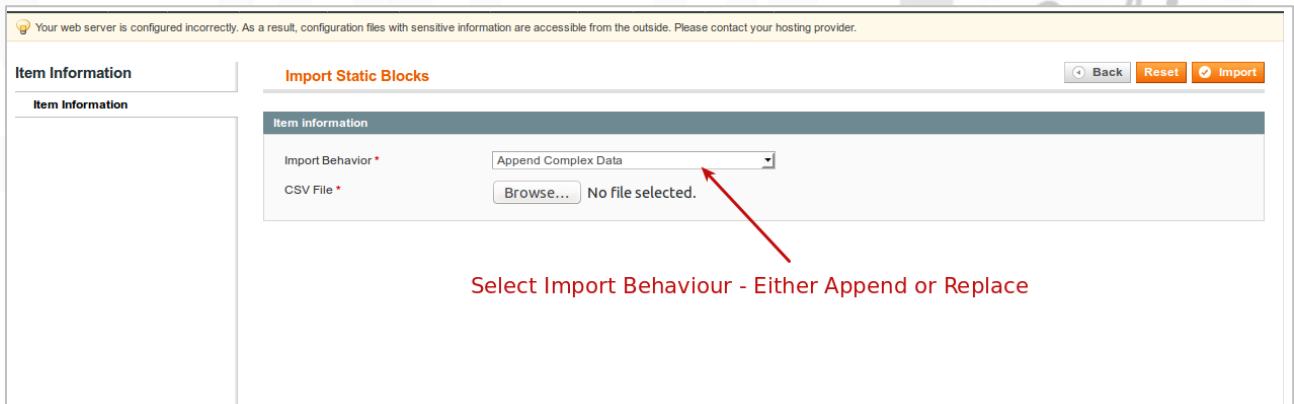

- 11) **layout\_update\_xml** - magento XML for layout
- 12) **custom\_layout\_update\_xml**- magento XML for layout
- 13) **Date\_Created**
- 14) **Last\_Updated**
- 15) **custom\_theme\_from**
- 16) **custom\_theme\_to**

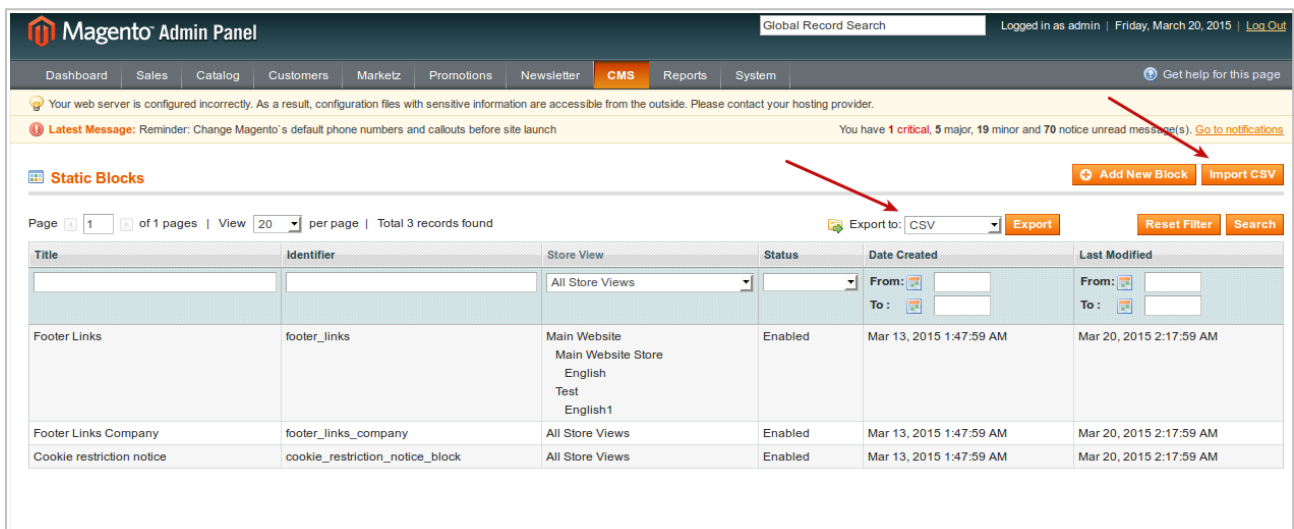

First 6 fields are mandatory.
