Home Page Popup

Cartin24 creates an extension for Magento 2 to display custom home page popup. This Extension provides an easy way to attract leading customers who are actually interested in your services and products. It also provides an ideal solution for promotion campaigns on our website. Admin can create multiple popups and can set the content to be displayed in the Popup from backend. At a time only one popup will be shown. Loading delay behaviour of popup is customizable from backend

Features

- Display a single popup on front end home page.
- Option to create multiple popups, admin can choose the one which is to be displayed on frontend.
- Flexible content set up.
- Easy to manage popup display rules.
- Option to set loading delay for the popup.
- Option for Enable/Disable popup.
- Popup is able to work well with all devices: computer, laptop, ipad and smartphones.

Installation

During the installation process

1. Backup your web directory and store database
2. Navigate to the Cache Management page (**System-->Cache Management**), selecting all caches, clicking "disable" from the drop-down menu, and submitting the change. Or by running the command "php bin/magento cache:disable" from your magento root directory in command line.
3. Download ZIP Archive.
4. In your Magento 2 root directory create folder app/code/Cartin24/Popup

5. Copy files and folders from archive to that folder

6. In command line, using "cd", navigate to your Magento 2 root directory

7. Run commands:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy
```

8. Enable Magento Cache through **System-->Cache Management** or run command "php bin/magento cache:enable" from your magento root directory.
